SUMMARY

Fresh Graduate in Information Systems from Jambi University with a strong interest in system analysis, ERP systems, and database management. Experienced in supporting web-based system development, analyzing user requirements, system modeling (UML), and validating system functionality during an internship at Diskominfo. Familiar with SQL, data validation, API integration, and backend processes through an Independent Study program with Ruangguru. Detail-oriented, eager to learn, and motivated to grow as an IT professional.

EDUCATION

Jambi, Indonesia

JAMBI UNIVERSITY

July 2021 - Jan 2026

Bachelor of Information Systems

GPA: 3.65/4.00

WORK EXPERIENCE

Jambi, Indonesia

Dinas Komunikasi dan Informatika Kota Jambi

Jul 2024 - Aug 2024

Web Developer & System Analyst Intern

- Collaborated with frontend developers to build web applications for district offices.
- Analyzed requirements to define system functionality and data structures.
- Designed and managed MySQL databases to ensure efficient data flow.
- Maintained data accuracy and consistency across the system.
- Mapped system workflows and business processes during development.
- Aligned system features with user requirements through team collaboration.

Jambi, Indonesia

Studi Independent - Ruangguru

Feb 2024 - Jun 2024

Backend Engineering (AI Integration)

- Developed backend services in Go featuring real-time AI integration via Hugging Face APIs.
- Integrated GPT-2 models to enable automated response generation within the application.
- Implemented API request handling to process user queries and deliver AI results instantly.

ACADEMIC PROJECT

FOOD DELIVERY USER ADOPTION ANALYSIS

- Conducted quantitative research on user behavior using UTAUT2 and DOI models.
- Utilized SmartPLS (SEM) to analyze factors influencing service adoption and intent.
- Employed SPSS to perform comparative analysis on user perceptions across platforms.
- Executed statistical testing to ensure data validity, reliability, and hypothesis accuracy.

Certification

- SQL Course – Issued Apr 2026
 - Introduction to Software Quality Assurance – Issued Apr 2026
 - Software Engineering – Issued Jan 2026
 - Artificial Intelligence using go - Issued 2024
 - Basic Backend Programming - Issued 2024
-

SKILLS

Technical Skills :

- Business & Requirement Analysis
- Unified Modeling Language (UML)
- Software Development Lifecycle (SDLC)
- Data Validation & ERP System

Tools :

- Microsoft Office
- Jira / Trello
- Git / Github
- Draw.io

Programming :

- Go (basic)
- PHP
- JavaScript
- SQL

Soft Skills:

- Critical Thinking
 - Problem Solving
 - Team Collaboration
 - Detail-oriented
